# Series 1060 firing rest

The 1060-1 firing rest is suitable for all hand firearms with the corresponding fixture and for ammunition test devices up to a caliber of 7.62x63 (.30-06). Target adjustment is considerably simplified by the use of handwheels and combining with the optional LAD 1055-0 laser aiming device.

An optional collapsible rolling mechanism allows transporting without additional aids.

The 1060-1 firing rest can be firmly and securely connected to the floor with the help of ground anchoring and holes in the support feet.

The 1060-2 firing rest is suitable for all hand firearms with the corresponding fixture and for ammunition test devices up to a caliber of 12.7x99 (.50 BMG). Target adjustment is considerably simplified by the use of handwheels and combining with the optional LAD 1055-0 laser aiming device.

An optional storage compartment allows storing of additional resources without disturbing safe operation.

The 1060-2 firing rest can be firmly and securely connected to the floor with the help of ground anchoring and holes in the support feet.

Easily adjustable handwheels simplify target adjustment considerably.

The set position is secured by an inbuilt clamping device.

This enables precise and accurate repeated firing.
